

SIMATS ENGINEERING

ASSESSMENT TOOL 3

COURSE NAME: CSA07 COURSE CODE: Computer Networks

COURSE OUTCOME COVERED

CO1: *Apply the functions of OSI layer in enabling reliable data transmission across networks. (BL2, BL3)*

Assessment Tool Weightage: 30%

Annexure A

TECHNICAL PRESENTATION

Code of Conduct:

I ARAVIND L(192471050),M .Himanath sai (192525246),Sharvesh s(192525458)P.B VAMSI KRISHNA (192525147) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment.

I understand that any violation of academic integrity rules will result in disciplinary action.

ABSTRACT

- **6G** provides ultra-fast, low-latency, and intelligent wireless communication.
- The **OSI model** explains network communication using seven layers.
- This project compares **6G architecture** with the **OSI model**.
- It highlights technologies like **AI, THz, Edge Computing, and IoE**.
- The comparison shows how **6G improves future network performance and efficiency**.

RUBRICS FOR CALCULATION

Criteria	Weight age	Level 4 – Exemplary	Level 3 – Proficient	Level 2 – Developin g	Level 1 – Beginning
Understandin g of Concepts	25	Demonstrates thorough understanding and effectively integrates multiple concepts/technolo gies	Good understandi ng with proper integration of most concepts	Basic understandi ng; limited or partial integration	Poor understandi ng; unable to integrate concepts
Experimental Design	30	Well-planned, systematic implementation with optimal solution	Correct implementat ion with minor issues	Basic implementat ion with errors or inefficiencie s	Incorrect or incomplete implementat ion
Use of Tools	20	Effective and advanced use of tools/technologies with proper configuration	Appropriate use of tools with correct execution	Limited or inconsistent use of tools	Incorrect or minimal use of tools
Analysis of Results	15	Insightful analysis with accurate interpretation and validation of results	Good analysis with reasonable interpretatio n	Basic analysis with limited insights	Poor or incorrect analysis of results
Documentati on	10	Clear, well- structured documentation with diagrams, code, and results	Organized documentati on with necessary details	Basic documentati on with missing details	Poor or incomplete documentati on
